

Rice and Wheat Harvester Reaper Swather

This versatile agricultural machine is designed for harvesting rice and wheat. It functions as a harvester, reaper, and swather, streamlining the grain harvesting process.

Product Overview

Efficiency in Grain Harvesting

The 4G100 is a versatile agricultural machine specifically engineered for harvesting rice and wheat. By functioning as a multi-purpose harvester, reaper, and swather, it significantly streamlines the grain collection process for professional farming operations. Designed for reliability and ease of use, this equipment ensures high-performance output in diverse agricultural settings.

Technical Specifications

Matched Power

- F170 (4.4hp)
- JF168 engine

Model Number	4G100
Suitable Crops	Wheat, Rice

Performance Metrics

Operational Efficiency

1 M

Reaping Width

0.33 ha/h

Max Working Efficiency

Design Features
