

Rice Cooker Fan Mould

This fan mould is designed for use in rice cookers. It features a toothed outer ring with evenly spaced slots and several small internal components.

Product Overview

Precision Fan Moulding Solution

This specialized mould is engineered for the production of fan components, specifically optimized for rice cookers and similar household appliances. Designed for high precision and long-term durability, the modular assembly includes a toothed outer ring and integrated internal gears. It represents an essential tool for manufacturers seeking consistent performance and reliable part production in the appliance industry.

Technical Standards

Applicable Industries

- Consumer Appliances
- Automotive Parts
- Semiconductor Components
- Electrical Connections

Quality Certifications

ISO 9001:2008

Manufacturing Capabilities

Production Focus

Injection Molding • Die Casting • Precision Tooling • R&D Technical Support

Process Standards

- Standardized Process Management
- ERP Integrated Workflow
- Rigorous Quality Testing
- Continuous Technical Improvement
