Product Overview

High-Performance Rice Huller Rollers

These professional-grade rice huller rubber rollers are engineered for high efficiency and reliability in rice processing machinery. Constructed with advanced materials for superior wear resistance, they ensure optimal grain removal with minimal breakage. With a focus on durability, these rollers are suitable for diverse milling requirements and provide a consistent service life for high-volume operations.

Technical Specifications

Available Materials	SBR, NBR, PU
Core Material	Iron Drum

Performance Data

Annual Production Capacity

600000 pieces

Production Capacity

Dimensions

Commonly Available Sizes

Size Class	Height (mm)	Diameter (mm)
6 inch	152	224
14 inch	355	227
