

Rice Huller Rubber Roller

Rice huller rubber rollers are designed for efficient husk removal from rice grains. These durable rollers minimize grain breakage, maximizing yield during the milling process.

Product Overview

Professional Rice Huller Rubber Roller

This high-performance rubber roller is precision-engineered for the effective hulling of paddy rice. Constructed with a durable NBR rubber surface and a robust cast iron drum, it is designed to maximize yield while minimizing grain breakage. Its durable material composition ensures excellent abrasion resistance and consistent hulling efficiency throughout the milling process.

Technical Specifications

Outer Diameter	152 mm
Height	125 mm
Rubber Compound	NBR
Drum Construction	Cast Iron

Features

Performance Benefits

- Minimal grain breakage
- High abrasion resistance
- Consistent hulling efficiency
- Durable construction for long service life
