Product Overview

High-Performance Rice Huller Rubber Roller

These professional-grade rubber rollers are engineered specifically for the efficient dehulling of paddy rice. Designed to provide excellent grip and superior abrasion resistance, they ensure minimal grain breakage and maximum yield during the milling process. The rollers are available with both cast iron and aluminium drums to suit various industrial milling machine requirements.

Technical Specifications

Diameter	2270 mm
Height	300 mm

Material Composition

Drum Material Options

- Cast Iron
- Aluminium

Rubber Materials	SBR, NBR
------------------	----------
