Product Overview

Combined Rice Milling Solution

This combined rice milling machine is designed for efficient paddy processing, making it an ideal choice for families, small farms, and grain processing plants. It integrates multiple functions into a single unit, allowing for husking, polishing, and separating in one pass. With a focus on safety and ease of use, the machine performs reliably even under full-load conditions and offers flexible power options to suit various operational environments.

Technical Specifications

Performance Data

Metric	Value
Model	N6.0F-21ZS
Matched Power	3-5 HP
Rated Voltage	220V
Weight	71 kg

Production Capacity

200 kg/h

Production Rate (Low Speed)

320 kg/h

Production Rate (High Speed)

Operational Features

Key Advantages

- Easy to operate with adjustable pressure handle
- Efficient chaff collection system
- Safe operation under full loading conditions
- Customizable color and non-standard design options available

Power Compatibility

Electric Motor, Diesel Engine Compatible, Gasoline Engine Compatible

Logistics & Support

Packing Terms

- Carton box
- Wooden box
- Plywood box

Warranty

1 Year

Delivery Terms

FOB, CFR, CIF, EXW, FCA
