

Rice Milling Machine

This machinery is designed for processing grains into refined rice. It features a hopper for input, a milling chamber, and an outlet for processed grains.

Product Overview

Professional Rice Milling Solution

This industrial-grade rice milling machine is engineered for high-efficiency grain refinement and cereal processing. Designed for durability and consistent performance, it features a specialized milling chamber and integrated hopper system to ensure optimal output quality. It is a reliable asset for food and beverage facilities requiring robust, long-term processing capabilities.

Technical Specifications

Primary Application	Cereal Processing & Grain Refinement
Industry Compatibility	Food Processing, Beverage Industry, Cereal Milling

Key Features

Core Components

- Input Hopper
- High-Performance Milling Chamber
- Processed Grain Outlet

Build Quality

Industrial Grade • Durable Construction
