

Rice Milling Machine

This rice milling machine is designed for efficient rice processing. It features a hopper for feeding paddy, a milling chamber for removing husk and bran, and a discharge chute for collecting polished rice.

Product Overview

Versatile Combined Milling Solution

This combined rice and flour mill offers a space-saving, dual-function design perfect for small-scale operations and home use. It efficiently handles both grain dehulling and flour production, making it a highly versatile tool for processing rice, wheat, corn, turmeric, and chili. Engineered for simplicity, the unit is easy to operate and maintains high efficiency in compact environments.

Performance

Processing Capacity

150 kg/h

Rice Milling Capacity

250 kg/h

Flour Milling Capacity

Technical Details

Processable Materials

Function	Compatible Grains/Spices
Rice Milling	Rice, Millet, Corn (Dehusk)
Flour Milling	Corn, Wheat, Turmeric, Chili

Key Features

Dual-function, Compact Design, Easy Operation, Home-use Friendly
