

Rice Seeder Sowing Machine

This rice seeder sowing machine is available in 8-row and 10-row configurations. It optimizes seed distribution and spacing for enhanced crop yields.

ADDITIONAL IMAGES

Product Overview

Precision rice seeder designed for efficient and uniform planting across different field conditions.

High-Efficiency Rice Seeder

This professional-grade rice seeder sowing machine is engineered for precision and productivity in paddy fields. Available in 8-row and 10-row configurations, it ensures uniform seed distribution while allowing for adjustable planting depth and row spacing. Its robust design is capable of navigating challenging, wet agricultural environments to optimize crop yields.

Key Features

Why Choose This Machine

Easy Operation, Durable Construction, Adjustable Planting Depth, Uniform Seed Delivery, Stable Supply Capacity

Technical Specifications

Self-propelled design built for high productivity and reduced manual labor.

Model Specifications

Feature	2BD-830	2BD-1025
Sowing Rows	8	10
Working Width	240 cm	258 cm
Machine Weight	126 kg	132 kg
Operational Efficiency	6-10 Mu/h	8-12 Mu/h
Sowing Spacing	30 cm	25 cm

Power & Performance Metrics

8 kW

Min Power

14.8 kW

Max Power

80 r/min

Min PTO Speed

200 r/min

Max PTO Speed

Operational Details

High-performance planting ensures consistent growth in waterlogged paddy environments.

Warranty Support

One-year warranty included, covering free replacement parts for quality-related issues.
