Overview

Professional Rice Storage Solution

Maintain the highest quality and freshness of your rice supply with this advanced semiconductor refrigeration unit. Engineered for precision, it features a constant temperature range of 15-20°C to prevent moisture and spoilage. The integrated knob-controlled system allows for customizable portion output, making it an ideal choice for commercial kitchen efficiency.

Technical Specifications

Total Capacity	10 kg
Cooling Technology	Semiconductor chip refrigeration
Storage Temperature	15-20

Performance Metrics

Portion Control Settings

2 persons
Min Output

6 persons
Max Output

Features

Advanced Functions	Low Noise, Environmental Protection, Auto-Warning System, Removable Cover, Easy-Move Rollers
