Overview

Professional Rice Vacuum Sealing

This advanced vacuum packing machine is engineered for the precise packaging of rice and granular food products. It utilizes a specialized vibration and bag-shaping mechanism to achieve perfect brick or flat-shaped results. Designed for high-hygiene commercial environments, the machine features robust stainless steel construction to ensure durability and ease of sanitation.

Technical Features

Key Machine Features

- Brick and flat shape packaging capability
- Integrated vibration system for bag shaping
- Transparent observation lid
- Digital control interface
- Built-in high-performance vacuum pump
- Heavy-duty casters for mobility

Certifications

Compliance & Standards	CE, UL, IEC
