

Rice Whitening Machine

This rice whitener utilizes advanced milling technology for efficient bran removal, resulting in polished and whitened rice. It features adjustable settings for optimal whitening control and ensures consistent quality with high throughput.

Overview

High-Efficiency Rice Whitening Solution

This high-performance MNML52 rice whitening machine is engineered for professional rice milling operations, focusing on the precise removal of bran layers. It combines robust industrial-grade construction with advanced milling technology to ensure consistent whitening quality while minimizing grain breakage. Designed for high-throughput environments, this machine provides reliable and durable service for large-scale agricultural processing.
