Product Overview

Professional Concrete Finishing

This ride-on power trowel is engineered for high-efficiency smoothing and leveling of large-scale concrete surfaces. Featuring a robust gasoline engine and dual control levers, it provides the precision necessary for professional-grade finishes in warehouses and industrial facilities. The ergonomic operator station ensures comfort during extended use, while integrated safety guards protect the rotating blade assembly.

Key Features

Equipment Highlights

- Dual control levers for precise maneuvering
- Ergonomic operator seat for extended comfort
- Protective safety cage around rotating blades
- Integrated lighting system for improved visibility
- Hydraulic control system
