Product Overview

Professional Concrete Finishing

This ride-on power trowel is engineered for high-efficiency smoothing and leveling of large-scale concrete surfaces. Featuring a robust internal combustion engine, it offers professional-grade performance for industrial and commercial flooring projects. The operator-centric design includes an ergonomic seat and intuitive controls to ensure precision, safety, and consistent results on demanding job sites.

Key Features

Standard Equipment

Ride-on operation, Adjustable blade pitch, Variable speed control, Protective safety cage, Integrated lighting system

Performance Metrics

Operational Performance

2 set

Trowel Rotors

Technical Specifications

Design Specifications

Feature	Detail
Application	Large floor & slab finishing
Power Source	Internal combustion engine
Safety	Enclosed rotating blade cage
Visibility	Integrated work lights
