Product Overview

Professional Rice Transplanting Performance

The Z2G-630A is a new generation ride-on rice transplanter designed for high-efficiency operation in paddy fields. It features a robust design that focuses on operator comfort, low noise levels, and high mechanical reliability for demanding agricultural environments. Equipped with a powerful 18.5kw engine, this machine ensures consistent planting depth and spacing for optimized crop yields.

Technical Specifications

Engine Power

18.5 kW

Rated Power

Design Advantages

- Consistent planting depth
- Uniform row spacing
- Advanced operator ergonomics
- Optimized for paddy fields

Key Performance Features

Ride-on operation, Low noise, High reliability, Self-propelled
