

Right Angle Coaxial Adapter for Satellite TV LNB

This right-angle adapter is designed for use with LNB units in satellite TV systems, allowing a 90-degree change in coaxial cable direction. It features a standard F-connector interface for easy installation and secure connection.

Overview

Right Angle Coaxial Adapter for LNB

The KGP-LA40 is a right-angle adapter designed for use with LNB (Low-Noise Block downconverter) units commonly found in satellite TV systems. This adapter allows for a 90-degree change in the direction of the coaxial cable connection, which is ideal for installations where space is limited or a straight cable run is not feasible. Constructed from durable materials, it ensures reliable performance, minimizes signal loss, and provides a secure, standard connection.

Technical Specifications

Connector Interface	Standard F-connector
Orientation	90-degree right angle
Primary Application	Satellite TV, LNB Connection, Coaxial Cabling

Features

Key Benefits

- Space-saving design
- Durable construction
- Reliable signal integrity
- Easy installation
