

Right Angle Corner Bracket

These corner brackets are designed for reinforcing right-angle joints. They are constructed from durable metal and feature pre-drilled holes for easy installation.

Product Overview

Heavy-Duty Right Angle Corner Bracket

These heavy-duty corner brackets are engineered to provide superior structural integrity for right-angle joints. Constructed from durable metal with a sleek black finish, they are designed to prevent wobbling and collapse in various construction applications. Featuring multiple pre-drilled holes, these brackets ensure efficient and secure installation for both woodworking and metalworking projects.

Technical Specifications

Finish	Black
Material	Metal
Installation Features	Pre-drilled holes, Screw compatible, Bolt compatible

Applications

Common Applications

- Furniture construction
- Shelving units
- Woodworking projects
- Metalworking projects

Performance

Key Benefits

Heavy-duty construction • Enhanced support • Prevents wobbling • Rigid joint reinforcement
