

Right Angle PAL Male Coaxial Connector

This is a right-angle PAL male connector for coaxial cable terminations. It provides a secure and efficient connection in television and radio frequency applications.

Overview

Right Angle PAL Male Coaxial Connector

The Right Angle PAL Male Coaxial Connector is a specialized component engineered for efficient signal transmission in television and radio frequency applications. Its right-angle configuration is specifically designed for space-saving installations where clearance is limited. Built with robust construction, this connector ensures a secure, reliable termination for coaxial cables.

Physical Dimensions

Length	22.2 mm
Diameter	11 mm

Technical Specifications

Connector Type	PAL Male
Orientation	Right Angle
Common Applications	Television, Radio Frequency, Coaxial Termination

Key Features

Design Benefits

- Space-saving right-angle design
- Robust construction for durability
- Reliable signal transmission
