

Right Angle Worm Gear Speed Reducer

This right angle worm gear speed reducer is designed for industrial applications. It features precision gearing within a compact housing for efficient power transmission and robust construction.

Product Overview

Industrial Worm Gear Speed Reducer

The FCPDK series worm gear speed reducer is engineered for efficient power transmission in demanding industrial environments. Featuring a robust, compact housing and precision-engineered gearing, this unit is designed for reliable torque amplification and speed reduction. Its versatile design makes it an ideal choice for integrating into diverse machinery and automated equipment systems.

Technical Specifications

Available Center Distances

- 30mm
- 45mm
- 50mm
- 63mm
- 63Amm
- 85mm
- 110mm

Series Model

FCPDK

Product Features

Key Features

Right Angle Configuration, Compact Design, Precision Gearing, High Durability
