

Rim Lock with Security Chain and Keyed Cylinder

This rim lock enhances security with its durable metal construction and keyed cylinder. A heavy-duty chain is included for added protection, preventing the door from fully opening when engaged.

Product Overview

Enhanced Security Rim Lock

This robust rim lock is engineered for superior door security in both residential and commercial environments. Featuring a durable metal construction and a reliable keyed cylinder mechanism, it provides a dependable barrier against unauthorized entry. The integrated heavy-duty security chain offers an additional layer of protection, allowing for controlled door opening while maintaining safety.
