

RJ45 Network Cable Connectors

These RJ45 connectors are designed for terminating computer network cables. The clear plastic connectors feature gold-plated contacts for reliable data transmission and a secure connection.

Product Overview

Professional Ethernet Connectivity

These RJ45 network cable connectors are essential components for terminating and repairing computer network cables. Featuring high-quality gold-plated contacts, they ensure reliable data transmission and signal integrity for your Ethernet infrastructure. Designed for durability and ease of use, these connectors are the ideal choice for creating custom-length cables or maintaining existing network setups.

Technical Specifications

Connector Type	RJ45
Contact Plating	Gold-plated
Body Material	Clear Plastic

Usage & Application

Compatibility	Standard Ethernet Cables
Primary Applications	Network Cable Termination, Custom Cable Assembly, Repair and Maintenance, Ethernet Infrastructure
