

RJ45 Single Port Faceplate 86x86mm

This faceplate is a standard 86 size, making it compatible with standard information back boxes and modules. It features a standard RJ45 interface and supports a single port capacity.

Product Overview

Professional Connectivity Solution

This single port faceplate is designed for reliable termination of communication cables in both residential and commercial environments. Featuring a standard RJ45/telephone jack opening, it ensures seamless integration for network or telephone connectivity. The durable white plastic construction provides a clean, professional aesthetic suitable for any interior wall installation.
