

RO Water Purification Machine

This water purification machine features a multi-stage filtration system including PP cotton, UF, and RO filters. Designed for home use, it provides purified water on demand and includes a digital display showing water quality and filter status.

Product Overview

Comprehensive Home Water Purification

This advanced water purification machine utilizes a sophisticated multi-stage filtration system to ensure high-quality, clean water on demand. Designed for efficiency and ease of use, it features a digital interface that monitors water quality parameters and tracks filter status in real-time. With its sleek and modern aesthetics, it seamlessly integrates into home environments while providing reliable daily performance.

Technical Specifications

Filtration Stages

- PP Cotton Filter
- UF (Ultrafiltration) Filter
- RO (Reverse Osmosis) Filter

Key Features

Digital Display, Real-time Water Quality Monitoring, Filter Life Tracking, User-Friendly Interface

Application

Usage Environment

Residential / Home Use
