

Road Milling Bit with Tungsten Carbide Tip

This road milling bit is designed for asphalt and concrete removal on road surfaces. It features a durable tungsten carbide tip for extended wear life and efficient cutting.

Product Overview

Professional Grade Milling Performance

This high-performance road milling bit is engineered for precision removal of asphalt and concrete surfaces. Featuring an exceptionally durable tungsten carbide tip, it offers an extended wear life that maximizes operational efficiency on the job site. The robust steel body construction is specifically designed to withstand high impact and abrasion, ensuring consistent performance for intensive road construction and maintenance projects.

Technical Specifications

Compatible Machinery	Wirtgen, CAT, Bomag
Tip Material	Tungsten Carbide
Body Material	Hardened Steel

Application Details

Recommended Applications

- Asphalt removal
- Concrete surface milling
- Road maintenance
- Road construction
