Product Overview

High-Performance Milling Solutions

These professional-grade road milling picks are engineered for superior performance in demanding asphalt and concrete road construction and maintenance applications. Available in various models for both large and small milling machines, they offer a reliable solution for heavy-duty surface removal. Constructed with high-durability materials, these tools ensure extended wear life and consistent results across various road milling environments.

Key Performance Metrics

Machine Compatibility	Wirtgen, Volvo, Caterpillar, Bitelli, Roadtec, Bomag
Application Fields	Asphalt Milling, Concrete Milling, Trenching, Mining, Tunneling

Technical Specifications

Product Dimensions Comparison

Model	Tip Diameter (in)	Body Diameter (in)	Shank Diameter (in)
CM03	0.69	1.5	0.79
CRS16	0.47	1.5	0.79
CRP18	0.63	1.26	0.79
