Overview

Professional Urban Cleaning Vehicle

This versatile road washing vehicle is engineered for comprehensive urban maintenance, supporting tasks ranging from surface cleaning and dust suppression to specialized irrigation. Equipped with a multifunctional spray system, it offers precise control over water output for diverse applications like tree watering and facility cleaning. Built with industrial-grade durability, it features advanced anti-corrosion protection and flexible operational configurations to meet the demanding requirements of municipal and construction environments.

Technical Features

Operational Functions

- Road surface washing
- High and low pressure spraying
- Tree and lawn irrigation
- Dust suppression
- Pesticide application
- Guardrail cleaning

Spray Patterns

Straight Shot, Heavy Rain, Medium Rain, Light Rain, Drizzle

Equipment & Systems

Pump Specifications

- Dedicated self-priming sprinkler pump
- Self-draining capability
- Fire fighting interface
- Self-flow valve

Safety & Monitoring

Sprinkler warning music, Double arrow warning light, Water level gauge

Construction

Tank Specifications

- Penetration non-destructive flaw detection
- Interior anti-corrosion coating
- Optional 304 stainless steel construction

Chassis Configuration

6x4 Series
