

# Robotic Hard Floor Vacuum Cleaner

This robotic vacuum cleaner is designed for efficient cleaning of hard floors. It features multiple cleaning modes and smart navigation to cover the entire floor.

## ADDITIONAL IMAGES

## Product Overview

### Smart Cleaning Solution

This high-efficiency robotic vacuum cleaner is purpose-built for hard floors, utilizing a slim profile to reach under furniture with ease. It features intelligent navigation and a high-performance suction motor designed to capture dust, debris, and pet hair across all cleaning paths. With automated charging and advanced safety sensors, this device provides a hands-free, reliable maintenance solution for busy environments.

## Cleaning Performance

Cleaning Modes	Automatic, Spot Cleaning, Edge Cleaning
Surface Compatibility	Hard Floors

## Technical Specifications

### Navigation & Safety

- Smart navigation system
- Obstacle detection sensors
- Anti-drop sensors for stairs

Autonomous Operation	Yes
Power Management	Automatic return to charging dock
