

Robotic Pet Hair Vacuum Cleaner

This model offers four cleaning functions: sweeping, vacuuming, dry mopping, and sterilizing. Operating noise is below 50 dB, and its sensors prevent it from getting stuck.

Product Overview

Advanced Robotic Cleaning Solution

This advanced robotic vacuum cleaner offers a comprehensive 4-in-1 cleaning experience, combining sweeping, vacuuming, dry mopping, and UV sterilization. Designed for efficiency, it features intelligent navigation with virtual wall support, cliff sensors, and anti-collision technology to ensure safe and thorough operation. With its low-noise design and HEPA filtration, it provides a quiet, hygienic cleaning solution suitable for modern homes.

Technical Specifications

Power Consumption	24 W
Voltage	14.4 V
Battery Capacity	2200 mAh
Working Time	90-150 minutes
Charging Time	3-4 hours
Noise Level	50 dB

Operating Environment

Operating Temperature	-10°C to 45°C
Operating Humidity	d85%RH

Features & Capabilities

Certifications

CE • EMC • RoHS

Smart Features

- Virtual Wall Detector
- Automatic Recharge
- On-board Scheduling
- UV Lamp Disinfection
- Cliff Sensor
- Anti-collision

Cleaning Functions	Sweep, Vacuum, Mop, Sterilize
