

Robotic Swimming Pool Floor Cleaner

This robotic pool cleaner is designed for efficient and automated cleaning of swimming pool floors. It utilizes a powerful suction mechanism to remove dirt, debris, and algae, ensuring a clean swimming environment.

Product Overview

Automated Pool Maintenance Solution

This robotic swimming pool floor cleaner is engineered for high-efficiency, automated debris removal. Its streamlined four-wheel design ensures superior maneuverability across various pool surfaces, effectively clearing away dirt and algae. Equipped with a dedicated remote control unit, users can easily customize cleaning cycles and operate the device for precise maintenance.

Technical Specifications

Performance Highlights

4 wheels

Wheel Count

Cleaning Mechanism	High-power suction system
Navigation	Four-wheel drive
Control Features	Remote control included, Programmable cycles, User-directed operation
Power Connection	Durable heavy-duty power cord
