Product Overview

Automated Cleaning Solution

The CRL-300V is a sophisticated robotic vacuum cleaner engineered for efficient, hands-free floor maintenance. Its low-profile, circular design allows it to navigate seamlessly under furniture, while advanced sensors ensure intelligent obstacle avoidance and edge detection. Designed for versatility, this unit effectively handles a variety of surfaces including hardwood, tile, and carpet.

Technical Specifications

Design Features

Low-profile • Circular • Obstacle Avoidance • Edge Detection

Compatible Surfaces

Hardwood, Tile, Carpet

Cleaning System

Brush System

- Central rotating brush system
- Side brushes for edge cleaning
