Product Overview

High-Efficiency Autonomous Cleaning

This advanced robotic vacuum cleaner utilizes laser navigation technology to create real-time 2D maps, ensuring comprehensive floor coverage without omissions. It features a versatile 2-in-1 vacuum and mopping system with a capillary watering design for sparkling floors. With smart app-based controls, users can define forbidden zones and monitor cleaning progress remotely, while the unit's automatic recharging capability makes it ideal for large-area maintenance.

Technical Performance

Suction Power

1500 Pa

Suction Strength

Cleaning Modes

Vacuuming, Mopping, Edge Cleaning

Smart Features

Control Options

- Wi-Fi Connectivity
- Mobile App Integration
- Real-time Mapping
- Forbidden Zone Configuration

Operational Details

Automatic Recharge & Resume

Yes

Navigation Technology

Advanced Laser Navigation
