

Robust Engine for Generators and Water Pumps

This robust and reliable engine is designed for various applications. Its compact design allows easy integration into different machines and equipment.

Overview

Robust Engine for Generators and Water Pumps

This engine is engineered for reliability and durability in demanding applications. Featuring a compact and efficient design, it integrates seamlessly into small machinery like generators and water pumps. With advanced components such as a high-quality carburetor and a sturdy crankshaft, it delivers consistent performance and easy starting even under heavy operational loads.

Performance

Power Output

5.5 HP

Rated Power

Technical Specifications

Cooling System	Air-cooled
Key Features	High-quality carburetor, Reliable ignition system, Sturdy crankshaft, Compact design

Applications

Ideal Applications

- Generators
- Water pumps
- Small machinery
