

Rock Core Barrel for Drilling and Piling

This core barrel is designed for efficient rock drilling and piling operations. Its durable construction ensures longevity and reliable performance in demanding construction environments.

Product Overview

High-Performance Rock Core Barrel

This specialized core barrel is engineered for demanding rock drilling and piling operations. Designed with a robust structure and effective cutting teeth, it excels at bulldozing through challenging materials like reinforced concrete and high-strength hard rock. Its durable construction ensures reliable performance, making it an essential tool for efficient core extraction and geological site investigation.

Technical Specifications

Applicable Formations

- Reinforced concrete
- Hard rock (Uniaxial compressive strength > 80Mpa)

Structural Features

Cutting tool for picks, Reinforced structure, Core retention mechanism

Customization

Technical parameters can be customized according to specific customer needs.
