

Rock Drilling Lance Tip

This lance tip is a critical component used in rock drilling and piling machinery. It is designed for precision and durability in demanding mining applications.

Product Overview

High-Performance Drilling Component

The Rock Drilling Lance Tip is a critical component engineered specifically for rock drilling and piling machinery. Designed to excel in demanding mining environments, this tip ensures both precision and durability during high-stress operations. Its robust construction provides reliable, long-lasting service, making it an essential part for maintaining efficient drilling performance.

Technical Specifications

Key Performance Features

- Precision engineering
- High-stress environment durability
- Efficient drilling performance
- Long-lasting service life

Model	HFO-200
Primary Applications	Rock Drilling, Piling Machinery, Mining
