Product Overview

Versatile Rock Drilling Solutions

This comprehensive rock drilling tool set is engineered for high-performance applications in tunneling, surface mining, trenching, foundation drilling, and road planning. Built for durability in harsh environments, these tools feature high-strength steel and wear-resistant carbide inserts to ensure consistent penetration and extended operational life. Each component is precision-engineered to provide secure connections and reliable results across a variety of geological formations and heavy machinery.

Technical Specifications

Available Carbide Tip Designs

Plug tips, Narrow-bottom, Flat-bottom

Application Variants

Tool Configuration Table

Application	Step Shank (mm)	Shank Size (mm)
Tunneling	38/30	38, 34
Surface Mining	38/30	42
Trenching	38/30	25, 22, 20, 19, 11
Foundation Drilling	38/30	N/A
Road Planning	N/A	20
