

Rock-Shaped Perforated Speaker

This is a rock-shaped speaker with a perforated design. It can be connected to audio devices for sound output.

Product Overview

Design-Integrated Audio Solution

This unique audio device features a rock-shaped exterior design, allowing it to blend seamlessly into outdoor or landscaped environments. The perforated surface is engineered to provide clear sound output while maintaining a discreet, natural appearance. It is an ideal choice for installations where aesthetic integration with the surroundings is a priority.
