

Roller Blind Tubular Motor

This tubular motor is designed for automating roller blinds. It features a robust construction with a metal mounting bracket and a hexagonal drive adapter.

Overview

Professional Tubular Motor for Roller Blinds

This high-performance tubular motor is engineered specifically for the seamless automation of roller blinds. Featuring a robust 45mm diameter design, it offers reliable operation with a power output of 180W and a consistent speed of 14 RPM. Built with durability in mind, the unit includes an IP44 protection rating, making it resistant to water splashes in various indoor environments.
