

Roller Followers Cam Follower Needle Bearing

Roller followers are specialized bearings designed for precise motion in cam or track systems. These bearings feature a thick-walled outer ring and rolling elements to handle high radial and shock loads.

Product Overview

Industrial Roller Followers

These yoke type track rollers feature a thick-walled outer ring designed to roll directly on bearing races while supporting significant radial and shock loads. They are engineered to provide precise, smooth motion in demanding industrial environments, including automation, packaging, and material handling systems. The outer rings are available in both cylindrical and cambered profiles to effectively manage edge stress and improve operational reliability.

Design Features

Outer Ring Profile	Cylindrical, Cambered
Construction Style	Yoke type with thick-walled outer ring

Series Availability

RNA Series

- RNA22/6
- RNA22/8
- RNA2200
- RNA2201
- RNA2202
- RNA2203
- RNA2204
- RNA2205
- RNA2206
- RNA2207
- RNA2208
- RNA2209
- RNA2210

RSTO Series

- RSTO 5
- RSTO 6
- RSTO 8
- RSTO 10
- RSTO 12
- RSTO 15
- RSTO 17
- RSTO 20
- RSTO 25
- RSTO 30
- RSTO 35
- RSTO 40
- RSTO 45
- RSTO 50
