

Roller Shutter Chain Block

Heavy-duty chain blocks lift and position heavy loads with precision and safety. Their robust construction uses high-strength alloy steel components for durability and reliability in demanding environments.

Product Overview

Innovative Lifting Solution

This roller shutter chain block features a world-first, humanized design engineered for versatile performance. It supports parallel ambulation, adjustable top and bottom distances, and can be securely fixed to the side of a wall. Designed for reliability, this unit is an ideal lifting solution for families, small-scale factories, and garages.

Key Features

Operational Capabilities

- Parallel ambulation movement
- Adjustable top and bottom distance
- Wall-side fixation compatibility

Common Applications

Residential, Small-scale Factory, Garage, General Maintenance

Construction

Build Quality

High-strength construction • Robust design • Humanized engineering
