Product Overview

High-Efficiency Shutter Production

This industrial roll forming machine is engineered for the high-volume production of versatile roller shutter slats, ranging from residential security solutions to heavy-duty storm and fire-proof shutters. It utilizes advanced PLC control systems to ensure precision manufacturing and safety. With options for high-speed operation and integrated servo motor tracking, this machine offers a reliable solution for durable, theft-resistant, and fire-safe door manufacturing.

Technical Specifications

Production Speed

30 m/min

Maximum Speed

Advanced Features

- Servo motor integration
- No-stop tracking cutting
- PLC computer program control
- Safety enclosures

Control System

PLC, Delta, Mitsubishi

Applications

Suitable Applications

- Parking lot doors
- Residential home doors
- Commercial shop fronts
- Garage doors
- Industrial fire-proof shutters

Safety & Protection

Theft Resistance • Fire Protection • Storm Protection
