Overview

High-Performance Roller Top Conveyor Belt

This modular plastic conveyor belt is engineered for efficient, low-friction box transportation in demanding industrial environments. Featuring a robust roller top surface, it minimizes contact resistance to protect goods while optimizing throughput. With a wide operational temperature range and food-safe material options, it is a versatile solution for both food processing and general manufacturing logistics.

Technical Specifications

Pitch	45 mm
Thickness	19.5 mm
Minimum Width	242 mm
Open Area	52 %
Rod Diameter	5.8 mm
Curve Capable	Yes
Available Materials	PP, POM, PE, PA
Available Colors	White, Blue, Gray, Nature, Dark-brown

Performance & Compliance

Compliance

FDA Approved • EU Compliant

Max Load Capacity

1.2 tons/m²

Load Capacity

Working Temperature

-40°C to 260°C

Configuration

Sprocket Configuration

- 8T Sprocket
- 12T Sprocket
- Square Bore
- Round Bore

Applications

Industry Compatibility

Sector	Industries
Food	Meat, Poultry, Seafood, Bakery, Snacks, Produce
Non-Food	Automotive, Tire, Packaging, Printing, Postal, Cardboard, Can/PET Mfg, Textile
