Product Overview

Reliable Backup Power for Rolling Doors

This valve-regulated lead-acid battery is designed to provide consistent, reliable backup power for rolling door systems. With a 24V capacity and durable construction, it ensures your access control remains operational during power outages. Each unit is built for long service life and high performance under varying usage conditions.

Technical Specifications

Nominal Voltage	24 V
Capacity	5 Ah
Weight	2.8 kg

Charging Guidelines

Charging Voltage and Current

Mode	Voltage Range	Initial Current
Standby Use	27.20V-27.60V	< 1.5A
Cycle Use	28.80V-30.00V	< 1.5A

Compliance and Safety

Operational Safety

- Avoid short circuits
- Do not charge in a sealed container
- Do not disassemble or incinerate
- Keep temperature below 50°C
- Recharge after use

Certifications

CE
