Overview

High-Efficiency Solar Thermal Solution

This roof-mounted, closed-circuit solar water heater is engineered for both residential and commercial applications, offering a sustainable way to reduce energy consumption. Designed to perform in diverse environments, it is particularly suitable for frost-prone regions and areas with harsh water chemistry. The system features a compact, space-saving design that ensures efficient and reliable hot water production.

Technical Specifications

Available Capacities

- 150L
- 200L
- 300L

Certifications

OG-100 Certified

Warranty Period

7 Years

Tank & Durability

Tank Coating	Titanium Blue Enamel
Max Temperature Resistance	85 °C
Corrosion Protection	Heavy-duty Anode Rod

Solar Collector

Collector Surface	Sputtered Selective Surface
-------------------	-----------------------------

Safety Features

Overheat Protection

Thermosyphon Arrestor Valve
