Product Overview

Built for Roofing Professionals

This premium roofing hammer is engineered for durability and efficiency, featuring a high-quality American hickory handle that offers superior shock absorption and a secure grip. The drop-forged 45# carbon steel head is precision-manufactured to DIN 1041 standards, ensuring professional-grade performance for roofers and slaters. Designed with a magnetic nail holder and a specialized punch head, it facilitates one-handed operation and reduces fatigue during demanding projects.
