

Rotary Connector Seal Kit for Excavators

O-ring kits with accurate dimensions for excavator machines. These O-rings are made of NBR materials and comply with international standards.

Product Overview

High-Performance Rotary Connector Seal Kit

This seal kit is engineered specifically for excavator central rotary connectors, providing a reliable solution for maintaining hydraulic system integrity. Designed to match the quality of genuine parts, these kits include a comprehensive range of sealing components such as polyurethane seals and rubber O-rings. They are essential for preventing fluid loss and ensuring efficient power transmission in heavy machinery.

Technical Specifications

Included Components

- Blue polyurethane seals (toothed profile)
- Black rubber O-rings
- Translucent/Clear seals

Material	NBR (Nitrile Butadiene Rubber)
Warranty	6 Months
Compatible Machinery Types	Excavator, Hydraulic Rotary Joints
