Product Overview

High-Performance Bevel Gear for Rotary Cultivators

This 22-tooth bevel gear is engineered specifically for rotary cultivators, providing reliable and efficient power transmission during soil preparation and agricultural cultivation tasks. Designed to meet or exceed stringent quality standards, this replacement part offers excellent durability and longevity. Its cost-effective construction helps minimize downtime and maintenance expenses, making it an essential component for demanding agricultural machinery applications.

Technical Specifications

High-quality precision-engineered 22t bevel gear for reliable power transmission.

Tooth Count	22
Compatible Model	Rotary Rx18
Gear Type	Bevel Gear

Compatibility

Compatible Tiller Series

- RX162
- RX164
- RX180
- RX182
- RX220
