

Rotary Cultivator Replacement Furrowing Disc

This is a replacement furrowing disc for rotary cultivators. It ensures efficient soil turning and optimal performance.

Product Overview

Professional Cultivation Component

This high-quality furrowing disc is engineered specifically for rotary cultivators, including the Rx162f model. It is designed to withstand demanding field conditions, providing reliable performance in soil preparation and cultivation tasks. Built for durability and precise operation, this component is an essential spare part for maintaining optimal efficiency in agricultural machinery.

Technical Specifications

Compatible Machine Model	Rx162f
Primary Application	Rotary Cultivator, Soil Preparation, Furrowing

Component Details

Essential spare parts for maintaining and repairing rotary tillers.

Material Characteristics

High-Durability • Robust Design

Part Category	Dish Furrow Rotavator Spare Parts
---------------	-----------------------------------

Compatibility

Supported Tiller Series

- RX162
- RX164
- RX180
- RX182
- RX220
