

Rotary Cutter Gearbox for Agricultural Machinery

This rotary cutter gearbox is designed for agricultural machinery. It efficiently transfers power from the tractor PTO to the cutter blades, ensuring optimal cutting performance.

Overview

High-Performance Rotary Cutter Gearbox

The GTM-035L rotary cutter gearbox is a robust component engineered specifically for agricultural machinery. It excels at efficiently transferring power from a tractor's PTO to the rotary cutter's blades, ensuring consistent and optimal cutting performance in demanding field conditions. Designed with a focus on durability, easy installation, and straightforward maintenance, this unit helps maximize uptime and overall productivity for agricultural operations.

Technical Specifications

Model Number	GTM-035L
Application	Agricultural Machinery / Rotary Cutter
Key Features	Robust Construction, PTO Power Transfer, Easy Maintenance, High Durability
