

Rotary Cutter Gearbox

This rotary cutter gearbox is a robust and efficient power transmission component designed for demanding agricultural and industrial applications. It is engineered to provide reliable performance in rotary cutters and similar equipment.

Product Overview

Robust Power Transmission

The GTM-30 rotary cutter gearbox is a high-performance power transmission component engineered for demanding agricultural and industrial applications. Featuring a durable cast iron housing and precision-machined gears, it ensures reliable operation and efficient power transfer in harsh environments. Designed for longevity and ease of maintenance, this unit is an ideal solution for rotary cutters and similar heavy-duty equipment.

Technical Specifications

Model Number	GTM-30
Housing Material	Cast Iron
Key Features	Precision-machined gears, High-quality bearings, Heavy-duty construction, Easy maintenance

Applications

Suitable Equipment

- Rotary cutters
- Agricultural equipment
- Industrial machinery
