

Rotary Dimmer Switch

This rotary dimmer switch is designed for controlling light intensity. It is rated for 120VAC 60Hz, with a 600W maximum load capacity, and is suitable for single or multiple gang installations.

Overview

Professional Rotary Dimmer Switch

This rotary dimmer switch provides precise control over LED lighting intensity, ensuring the perfect ambiance for any environment. Engineered for reliability and safety, it features a robust design suitable for various installation configurations. It is a UL-listed component, meeting rigorous standards for electrical performance and safety in commercial and residential applications.
